WHAT NOT TO PUT IN YOUR ATU SYSTEM

- Never put fats, oils, or grease down your waste system
- Do not put pesticides, herbicides, paints, automotive fluids, household chemicals, etc. in water system
- Do not dump mop bucket waste into your toilet or waste system
- Do not use heavy plumbing cleaners and toilet bowl fresher tabs/hangers in your toilet
- Do not flush disposable diapers, feminine hygiene products, cigarette butts, coffee grounds, paper towels, or bandages in your toilet or waste system
- Do not overload your ATU with laundry wastewater. Spread your laundry out over the week
- Avoid using excessive amounts of laundry detergent with wash loads
- Use fabric softener sheets rather than liquid
- Avoid using anti-bacteria soaps, disinfectants, or bleaches in the water that goes to the ATU
- Do not connect other water sources to the system, i.e., roof or footing drains
- Do not dispose of home brewery waste, strong medicine, or antibiotics down your toilet
